

March Science Café

# Power in the Nano City:

## Electricity, Democracy, and Mutual Influence

**Friday, March 15, 2013**

**5:30 p.m. - 6:30 p.m.**

**Arizona Science Center**

600 E Washington Street

Phoenix, AZ

(602) 716-2000

### How might nanotechnology change the power dynamics of future cities?

The word “power” can mean different things depending on context. It may simply mean electricity, or it may mean who has authority in a society.

### How do political power structures influence distribution of electricity?

This café will wrestle with these two definitions of power, and will explore how they may be used interchangeably.

Commissioner Paul Newman

Science Cafés are free, informal discussions that bring together members of the community and university faculty to discuss how science and technology can change the future.

In the typical café, a scientist and a humanist speak for 5-15 minutes on a topic, with the rest of the time for the public to ask questions and present concerns.

**Teachers receive 1 hour Professional Development for each Café attended.**
