

Chemical Engineering

Fall 2014 Seminar Series

School for Engineering of Matter, Transport and Energy

DATE	SPEAKER	TITLE
August 25 10:30 am BD105	A.T. Charles Johnson University of Pennsylvania Department of Physics and Astronomy	<i>"Graphene-Enabled Bio-Nano Hybrids for Chemical Detection"</i>
September 22 10:30 am BD105	Steven Chuang University of Akron Department of Polymer Science	<i>"Catalysts for Methane Utilization"</i>
October 10 10:30 am SCOB 210	Enrique Lavernia University of California, Davis Department of Chemical Engineering & Material Sciences	Distinguished Scholar Lecture <i>"Nanostructured Metals and Composites: From the Nanoscale to the Microscale"</i>
November 3 10:30 am BD105	Konstantinos Konstantopoulos Johns Hopkins University Dept. of Chemical & Biomolecular Engineering	<i>"Bioengineering Paradigms for Cell Migration in Confined Microenvironments"</i>
November 17 10:30 am BD105	Moh El-Naggar University of Southern California Department of Physics & Astronomy	<i>"The Biophysical and Structural Basis of Extracellular Electron Transport in Microbial Redox Chains"</i>
December 1 10:30 am BD105	Cristina Davis University of California, Davis Mechanical and Aerospace Engineering	<i>"Emerging Frontiers of Breath Analysis"</i>
