

Chemical Engineering

Fall 2015 Seminar Series

School for Engineering of Matter, Transport and Energy

DATE	SPEAKER	TITLE
September 14 10:30 am BD105	Hongcia Zhou Department of Chemistry Texas A&M University	<i>"Preparation of Stable Metal Organic Frameworks for Practical Applications"</i>
September 21 10:30 am BD105	Yoram Cohen Dept. of Chemical & Biomolecular Engineering University of California, Los Angeles	<i>"Distributed Water Systems: Water Treatment and Desalination for Potable Use and Salinity Management"</i>
September 28 10:30 am BD105	James Gilchrist Dept. of Chemical & Biomolecular Engineering Lehigh University	<i>"Convective Assembly of Nanostructured Materials"</i>
October 26 10:30 am BD105	Levom Jea;u Dept. of Bioengineering & Materials Science Eng University of California, Berkeley	<i>"Organs of a Chip: Future of Personalized Medicine?"</i>
November 6 1:30 PM Location TBD	Alexander Smits Department of Mechanical and Aerospace Eng Princeton University	<i>Distinguished Scholar Lecture</i> <i>"Large and Very Large Scale Motions in Turbulent Flow"</i>
November 16 10:30 am BD105	Kenneth Suslick Department of Chemistry University of Illinois, Urbana-Champaign	<i>"Optoelectronics Nose: An Adventure in Molecule Recognition"</i>
November 23 10:30 am BD105	Gregory Rutledge Department of Chemical Engineering	<i>"Electrospin Fiber Materials: Mechanics and Membranes"</i>
