

Materials Science & Engineering

Fall 2014 Seminar Series

School for Engineering of Matter, Transport and Energy

DATE	TITLE
September 19 1:30 pm SCOB 250	Brian Patterson Los Alamos National Laboratory Polymer and Coating Group <i>"Application of Quantitative 3D Imaging to Better Understand the Relationship between Chemical Formulations"</i>
October 10 1:30 pm SCOB 210	Enrique Lavernia University of California, Davis Department of Chemical Engineering and Material Sciences <i>"Nanostructured Metals and Composites: From the Nanoscale to the Microscale"</i>
November 7 1:30 pm SCOB 250	Henry Holrody Luxfer, Inc. Senior Vice President <i>"Environment-Sensitive-Fracture of High-Strength Aluminum Alloys"</i>
