

Core Tours

Come learn about the many resources available to researchers both at ASU and outside.

Tour the specialized facilities and speak to researchers about the many services available to you.

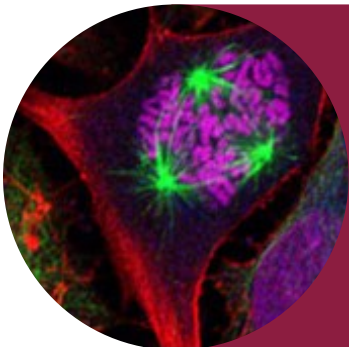

Illumina Next-Generation Sequencing Seminar & Genomics Core Tour

Thursday, October 26, 11 a.m.

Learn about the Genomics Core, offering both Sanger and Next Generation Sequencing, and the Bioinformatics Core. Also take the opportunity to go on a tour of the Genomics Core and see their specialized equipment.

Seminar in Biodesign Auditorium, followed by reception in Biodesign Lower Level Atrium with 10 minute tours

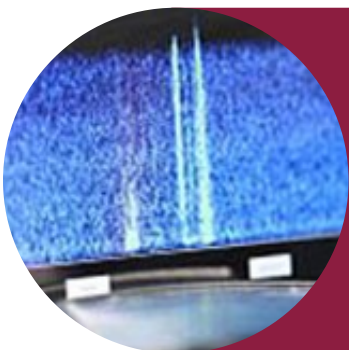

Imaging Core Tour

Thursday, November 8, 2 p.m.

Come see how the new Imaging Core can help with your research project! The facility houses state-of-the-art research tools to enable the observation of subcellular structures. Tour the cell culture lab and see these super tools in action!

Presentation in Biodesign Auditorium, followed by reception and 10 minute tours

Mass Spectrometry Core Tour

Wednesday, November 29, 2 p.m.

Get a special sneak preview of Biodesign's new core facility: the Mass Spectrometry core! Learn about the several new state of the art machines coming early next year and tour the new facility. Make sure that your grants include this special new piece of equipment!

Presentation in Biodesign Auditorium, followed by reception and 10 minute tours

*Register for this event on Research Academy
or by emailing Carolyn.Lofgren@asu.edu*

**Refreshments provided by
the Biodesign institute at Arizona State University**
