Learn about the wide array of scientific and technical services available to faculty, student and staff researchers at ASU and our partner institutions! Core scientists will present lightning talks to highlight capabilities, and investigators will review research applications made possible by core technologies.

Staff from more than 30 Core Research Facilities at ASU, Barrow Neurological Institute and Mayo Clinic will present posters and displays and answer questions about their services and capabilities to support bio, chemical, computing, electronics, health, and materials sciences…and more.

Special giveaway for the first 50 participants to register!
Onsite registration available.
Cocktail reception to follow.

Date
November 6, 2018

Time
1 – 5 p.m.

Location
Biodesign A
Lower Level Atrium
