

## ***FSE Deep Dive*** **Workshop Series:** **Research Development** **Workshops for Faculty** **2021-2022**

**ASU** Ira A. Fulton Schools of  
**Engineering**  
Arizona State University

Join us this year for a series of free FSE faculty workshops aimed at broadening understanding of various sponsor programs and facets of proposal development. These 45- to 60-minute monthly sessions will feature deep dives into program information, interactive panels with faculty and staff, as well as tips and tricks for developing competitive proposals.

### Upcoming ***FSE Deep Dive*** Workshops

#### [Understanding NSF's Industry-University Cooperative Research Center \(IUCRC\) Program](#)

**November 15, 1:00-2:00pm** - [Click link to register](#)

Session provides an overview of the IUCRC program, a panel discussion with faculty and staff, and information on applying for, setting up, and running an IUCRC.

#### [Maximizing Mid-Career Opportunities](#)

**December 14, 1:30-2:30pm** - [Click link to register](#)

Session will address some of the opportunities and challenges that arise in developing and expanding your research portfolio while juggling the demands of teaching and tenure.

#### ***Workforce Development: Developing Effective and Realistic Plans for Proposed Projects***

**February, TBD**

Discussion on how to create meaningful workforce development opportunities within your research programs for students, professionals, and those looking to shift careers.

#### ***Preparing for the NSF CAREER Program***

**March, TBD**

Session will address key requirements of the NSF CAREER program, how to message your project idea to the correct directorate, tips from prior awardees, and more!

#### ***Sponsored Fellowship Programs***

**April, TBD**

Session will review various sponsored fellowship programs, requirements needed, templates available and campus resources available to interested students and faculty.

#### ***Working with Task-Driven Sponsors: Introductory and Advanced (2 sessions)***

**April, TBD**

*101: How to Develop a Task-based Project* will address how to work with mission-driven sponsors (DOD, DARPA, DOE) that prefer task-driven project plans and budgets. *202: Tips and Tricks for Task-based Budgeting* explores methods for strategically developing a task-based project plan/budget, what level of granularity is appropriate, and considerations when planning project milestones.
