

I-BREATHE HACKATHON

How clean is the air you breathe indoors? Come hack with us to discover ways to protect everyone's right to clean air!!

Challenge:

Poor indoor air quality is linked to asthma, cardiovascular disease and many other adverse health outcomes, and disproportionately impacts people in low income groups.

Existing regulations ensure there are minimum quality standards for occupancy but they may be inadequate for good health.

You can help design new solutions to achieve cleaner and healthier indoor air.

JULY 15-17TH 2022

Teams can participate to win a cash prize

Prize:

First Place	\$500
Second Place	\$300
Third Place	\$200

(Team size max is 5 members)
