

Workshop: Effective Practices for Student Mentorship in Research

WEDNESDAY

APRIL 24

2.00 - 4.00 PM

**CAVC 301
THE IDEA LAB
TEMPE CAMPUS
(ZOOM AVAILABLE)**

RSVP HERE

This workshop is designed for faculty members and graduate students who want to enhance their mentorship skills, with a specific focus on guiding graduate and undergraduate students in various capacities, including research labs and as teaching or research assistants. Key topics will include establishing mutually beneficial mentor-mentee relationships, strategies for effective communication, onboarding students, and fostering professional development.

Dr. Mayra S. Artilles is an assistant professor in engineering at the Polytechnic School of the Ira A. Fulton Schools of Engineering at ASU. Her research expertise includes doctoral engineering programs, the experiences of minoritized students in doctoral engineering programs, and doctoral advising relationships.
